

We Claim:

1. An ashtray mirror combination for an exterior mirror of a vehicle said ashtray mirror comprising:

an aerodynamic cavity with a substantially rectangular front surface and a curved bottom surface tapering from front to rear, said cavity also having a substantially flat top surface;

a side rear-view vehicle mirror;

attachment means for attaching said aerodynamic cavity under said vehicle mirror;

a lid disposed on said flat top surface of said cavity;

said cavity sliding forward from a non-use position to a use-position, said cavity in said use-position protruding from under said mirror;

said lid having a spring means whereby said lid opens when said cavity is slid from said non-use position to said use-position.

2. The ashtray mirror combination of claim 1 wherein said rect-

angular front surface is polished.

3. The ashtray mirror combination of claim 1 wherein said lid closes when said cavity is slid from said use-position to said non-use position.

4. The ashtray mirror combination of claim 1 wherein cavity is removable for cleaning.
